

## Best Practices Training Scenarios

As a team, review the scenarios below, and discuss best practices for each. Learn from each other!  
Use the pens and paper provided to record your answers.

Be prepared to share what you found to be the most challenging situations, places where you feel most confident, new learnings, questions, key insights, etc...

Have fun! 😊

Scenarios:

1. Rooming patient; offer HIV test in English
2. Patient declines HIV labs, states they were recently tested
3. Patient looks uncomfortable that you offered HIV labs; immediately states they're not interested
4. Patient reports high risk behaviors (HIV): name what they are and proper workflow
5. Rapid HIV test comes back preliminary positive; name proper workflow.
6. Patient here for lipid panel, also due for HIV Screening
7. Patient reports recent escape from sex work, potential HIV exposure; name proper work flow.
8. What is nPEP? Name all scenarios when nPEP called for, and proper workflow
